Education

Rutgers University - New Brunswick

09.2017 – 01.2021

B.S. C.S. (GPA: 3.83/4.00)

Minor: Business Administration

Work Experience

Software Engineer @ Bloomberg, L.P. (NY)

02.2021 - Present

- Full-stack development within Asset Investment Management (AIM), Bloomberg's buy-side order management system. *C, C++, Python, Javascript/Typescript.*
- Maintain + enhance order/trade workflow for fixed-income + derivatives, with a focus on cross-currency swaps, money markets, corporate + municipal bonds.
- Contribute + lead Hackathon projects to facilitate developer workflow. *Flask, Python, Vue, Javascript.*
- VP of Women in AIM mentorship + leadership pillar. Co-organizing an on-going 6 mo. mentorship program.
- Interview + help with HR/recruitment events.

Software Engineer Intern @ Bloomberg, L.P. (NY)

06.2020 - 08.2020

- Designed rule engine to automate rollover of futures + FX, and optimize portfolio manager workflow. Implemented end-to-end BAS service using *Python* backend, *JavaScript/Typescript* frontend, *noSQL* database, and tools like *RabbitMQ, Docker.*
- Added internal terminal function, created integration tests for new + existing business handlers.

Software Engineer Intern @ Audible, Inc. (NJ)

06.2019 - 08.2019

- Designed + implemented iOS app home modules in *Swift* released V3.10. Worked with fetch requests to transport local + network data.
- Collaborated with the iOS core team, scrum team, other interns, + PMs. Utilized Agile + Scrum methodologies.

Projects

User-Level Memory Management Spring 2020

- Implemented virtual memory system in *C* via user-level, multi-level page table which translated virtual to physical addresses
- Implemented translation lookaside buffer.

Fitness Tracker App Spring 2019

- Designed + implemented iOS app in *Swift* that tracks daily fitness logs with reps, weights, and sets per exercise. Collaborated with backend + Android team.

Prediction Challenge Spring 2018

- Created 97% accuracy model using R Part and cross-validation. Used *R* to predict future political preference based on analysis of training data set of political preferences v. unusual behavioral characteristics.

Skills

Programming Languages

Python, C++, C, JavaScript/Typescript, Java, Swift/Objective-C, R, HTML/CSS

Tools

Linux, Docker, Vim, Flask, Git, AWS, XCode, Eclipse, RabbitMQ, SQL/noSQL

Academics

iOS Mentor @ R.U. Mobile App Development Club

Spring 2019

- Co-taught class of ~20 students on the foundations of iOS application development
- Co-structured + guided a two-semester long course design + deploy iOS applications in collaborative groups of iOS, Android, backend, frontend.

SAS Honors Excellence Award 09.2017 - 01.2021

Dean's List 09.2017 - 01.2021

Alpha Omega Epsilon 09.2018 - 01.2021

- Sorority for women in S.T.E.M.

FizzBuzz Club 09.2019 - 01.2021

- Treasurer, mentor for C.S. interview prep club

Rutgers Powerlifting 09.2018 - 01.2021
