Education

Rutgers University Sept 2017 – Jan 2021 // New Brunswick, NJ

GPA: 3.83 / 4.0

B.S. Computer Science // Minor: Business Administration

Relevant Coursework Data Structures, Computer Architecture, Discrete I & II, Systems Programming, Design & Analysis of Algorithms, Operating Systems, Computer Architecture (F'20), Deep Learning (F'20), Brain-Inspired Computing (F'20)

Work Experience

Engineering Intern @ Bloomberg, L.P.

Summer 2020 // Remote (New York City, NY)

- Created a rule engine that automates futures contract/FX rollovers to facilitate and optimize the current workflow for portfolio managers.
- Used *Python* for backend, *JavaScript* for frontend, created a new *noSQL* database and service, and learned to use tools like *RabbitMQ*.
- Added a Bloomberg Terminal function tail that supports order trade entry, given a session ID string and integration tests for current business logic handlers.

Software Developer Engineering Intern @ Audible, Inc.

Summer 2019 // Newark, NJ

- Created iOS app home modules in *Swift* released in V3.10. Worked with fetch requests, local, and network data.
- Collaborated with iOS Core team of 30+ and smaller scrum team by utilizing Agile software development process and Scrum framework.

iOS Mentor @ Rutgers University Mobile App Development Club

Spring 2019 – Present // New Brunswick, NJ

- Helped teach a class of <20 inexperienced students the foundations of iOS in *Swift*, eventually guiding them to build their own iOS applications in <1 year.

Projects

User Level Memory Management

Spring 2020 // Rutgers University

Created virtual memory system in *C* by building a user-level, multi-level page table that translates virtual to physical addresses as well as a translation lookaside buffer

Fitness Tracker App

Spring 2019 // Rutgers University Mobile App Dev Club

Designed and built iOS application in *Swift* that tracks daily fitness logs with reps, weights, and sets per exercise. Collaborated with backend and Android team.

Prediction Challenge

Spring 2018 // Rutgers University

Created 97% accuracy model using R Part and cross-validation. Used *R* to predict future political preference based on analysis of training data set of previous political preferences v. unusual behavioral characteristics.

Skills

Programming Languages

Java, C, Python, Swift/Objective-C, JavaScript, HTML/CSS, R, C++

Tools

Linux, Git, AWS, XCode, Eclipse, RabbitMQ, noSQL, Docker

Awards & Certifications

SAS Excellence Award

Fall 2017 – Present

Dean's List

Fall 2017 – Present

International Korean-American Studies Youth Fellowship

Winner

Summer 2016

Activities

Alpha Omega Epsilon sorority for women in STEM

FizzBuzz CS Interview Prep Club
treasurer, mentor

Undergraduate Student Alliance of Computer Scientists

Rutgers University Powerlifting
